WORK EXPERIENCE

Gain solutions Ltd., Mirpur-12, Dhaka, Bangladesh — Sr. Frontend developer

November 2023 - PRESENT

- I was working as a front-end developer in strides.io, a saas application. This application behaves like workable.com. Technologies: Laravel, VueJS, VueX, Bootstrap 4.6, Web RTC etc.
- I Developed a core project using TypeScript, VueJS 3, Pinia, Vite, full-calendar, dropzone, vuedragable, quill.js, dayjs, qs.js, bootstrap 5.3, loadash, axios and many other libraries. . The entire project we built uses the Vue Composition API.

Gain solutions Ltd., Mirpur-12, Dhaka, Bangladesh — Frontend developer

November 2021 - November 2023

- Developed a social media platform as a front end developer Features: Video, Audio, Poll, Reaction to post, Share, Team management etc. Technology: Laravel, VueJS, VueX, Bootstrap 4.6, Scss.
- I was working on the JobPoint recruitment management system as a front-end developer. I developed many features like dynamic from builder, page editor for desktop and mobile and many bugs fixed from the application.
- I was working on PayDay CRM where I developed an export module that includes all data exported to a csv file and makes connections with the backend job queue. Show progress to how much work is done in the backend.
- I was working on Multi-vendor POS. Where I developed a thermal printer layout using prinet.js and most of the front-end part.
- Email Marketing Application
- Invoice Management System

Upwork, Remote — Full stack developer

January 2020 - November 2021

<https://blogball.com/>

<https://www.join safeddeal.com/>

And many freelance projects.
